

Application No. 09/991,280
Amendment dated October 22, 2004
Reply to Office Action mailed March 3, 2004 (Paper No. 15)

Amendments to the Specification:

Please amend the paragraph appearing at page 8, lines 17-21 of the specification as follows:

A stopper 34 projects from the peripheral surface of the grommet 12 between the grommet flange 29 and is formed in the groove 31. The stopper 34 prevents the grommet 12 from rotating in the coupling hole 11 when the male thread 23 is meshed with the female thread 32A.
